📞 [3092976270](tel:3092976270)

Profile: Enthusiastic CS and Math undergraduate specializing in full-stack development, real-time applications, and cloud solutions. Skilled in React, Next.js, TypeScript, Python, AWS, and Node.js, with strong problem-solving abilities and algorithmic expertise.

EXPERIENCE

Synapse Technologies

June 2024 – August 2024

Software Developer Intern

Remote, USA

- Developed a scalable stock market simulation platform using **React**, **Express.js**, and **PostgreSQL**, integrating real-time financial data pipelines and backtesting capabilities.
- Implemented advanced analytics features enabling interactive data visualizations and strategy performance tracking.
- Enhanced system efficiency by **40%** through server-side optimizations, caching (**Redis**), and load testing using **K6**.

PROJECTS

Internship Application Assistant via MCP Servers | *Express.js, MongoDB, MCP, LLMs*

April 2025

- Built an AI-driven assistant using **MCP servers** to automate internship discovery and application management across LinkedIn and Handshake.
- Integrated **Claude** and **Gemini AI agents** to fetch top internship matches, track applications, and interact through natural language.
- Designed backend workflows with **Express.js** and **MongoDB** to store search results, application statuses, and email summaries to users.

iClicker System | *React.js, Firebase, Socket.IO, Node.js*

September 2024

- Developed a cost-effective web-based classroom engagement tool replacing physical iClickers, reducing costs by 100%.
- Built features like real-time attendance, analytics dashboards, and PDF/CSV report exports, using **Node.js** and **Socket.IO**.
- Implemented secure **OTP-based authentication** and **role-specific access controls** with MongoDB and Firebase.
- Optimized backend operations, reducing interaction latency by **50%** using **Redis** caching.

ClubSharing | *TypeScript, Tailwind CSS, AWS ECS, Postgres*

June 2024

- Developed a college club resource-sharing platform using **React.js**, **TypeScript**, and AWS Lambda.
- Designed workflows with **DynamoDB**, reducing storage overhead and improving data retrieval speeds.
- Integrated **JWT-based authentication**, approval workflows, and automated notifications via **Nodemailer**.
- Hosted the platform on **AWS** and **Vercel** to ensure scalability and responsiveness.

GitHub Comparer | *TypeScript, Qwen LLM, AWS, Node.js*

Jan 2025

- Developed an AI-powered GitHub profile comparer that fetches public repos and generates humorous roasts using **Qwen LLM**.
- Built a scalable backend with Node.js and Express, optimizing API calls for faster data retrieval.
- Designed a responsive UI with React and Tailwind CSS, enhancing user engagement.

EDUCATION

Knox College

Sept 2023 - June 2027

Bachelor of Science in Computer Science and Mathematics (GPA: 3.85)

Galesburg, Illinois

Coursework: Machine Learning, Algorithm Design and Analysis, Calculus, Software Development, Database Systems

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, HTML/CSS, C#

Tools: Microsoft Office, Visual Studio Code, IntelliJ IDEA, Android Studio, Git, GitHub, Docker, Kubernetes

Others: React, Next.js, Object Oriented Programming, Data Structures and Algorithms, AWS, PostgreSQL, MongoDB
